

## Coolant Flush Machine

Hansens Auto is able to thoroughly clean and revitalise your complete cooling system using our Wynn's Coolant Flush machine.

This state-of-the-art machine will replace up to 95% of your old coolant and safely remove damaging deposits from the engine, radiator, heater core and hoses.

Over time your vehicle suffers from scale, rust, dirt and debris build up inside the cooling system. Basic draining and refilling only replaces less than half of your old coolant. Regular maintenance of your cooling system ensures your engine stays cool and protected.

Avoid the chance of a future breakdown and expensive repairs. Fully protect your engine against the extremes of our climate, and condition for ultimate cooling efficiency and performance.
